

ESI

# SUN PROTECTION

THERE'S ONLY ONE ESI

PARABEN-FREE SUNCARE

## SOLAR SUNCARE

### PROTECTIVE INGREDIENTS

ALOE VERA

JAJOBA

SHEA BUTTER

VITAMIN E

CHAMOMILE

RETINOL

COQ10

GREEN TEA

ESI's Solar Sun care range is designed to offer maximum protection without the use of parabens or harsh synthetic ingredients.

These formulations contain ingredients that protect the skin from both UVA and UVB radiation which not only damage skin but speed up the skins ageing process

It is important to ensure that sun creams meet all the following requirements

- Stimulate the body's production of melanin
- Provide a barrier that filters out harmful rays
- Add moisture to the skin to reduce dryness

### SOLAR SPF 8

We would recommend that SPF 8 should be used during the winter as a moisturiser. Even during a cold winters afternoon it is possible to overexpose the skin on the face and hands especially during outdoor sporting events or while gardening. The cream absorbs well and can be used under makeup.

### Solar SPF 15 Anti-ageing

As well as containing gentle naturally moisturising ingredients Solar SPF 15 contains Hyaluronic acid, a highly researched starch based anti-ageing ingredient that is commonly used as a facial filler to increase the plumpness of the skin.

Solar SPF15 comes in a handy travel size box so it is especially useful for the face during the day and can be used when skiing.

Also contains retinol and Co Q10.

### SOLAR SPF 20

Solar SPF 20 offers useful all over protection and comes in a economical 150ml tube. The ingredients used ensure that the skin will not be irritated in any way. All ESI Solar products are tested to ensure that they are hypoallergenic and are suitable for the most sensitive of skins.

### Solar SPF 30

SPF 30 is particularly suitable for people with pale skin that don't tan easily and would prefer greater protection. We would suggest that children especially are always covered up in strong sunlight and Solar SPF30 provides great coverage, smells pleasant and does not cover the body with a white translucent coating.

As with the rest of the range SPF 30 is preservative free and contains no artificial colourings
